## Summary

Dedicated engineering professional with strong interpersonal skills and a collaborative mindset. Seeking a challenging role to leverage technical expertise and teamwork abilities to contribute significantly to organizational goals. Committed to continuous learning and professional development.

## Education and Training

Jaipur, Rajasthan

B.Tech in Computer Science Engineering form JK Lakshmipat University.

## Skills

- Languages: CSS3, HTML5, SASS, JavaScript(ES6), Bootstrap
- JavaScript Libraries: React JS, Redux, GSAP, Next JS, React native, Node JS, Axios
- Database: MongoDB, Firebase, My Sql
- Operating System: Windows 10/7, Linux Ubuntu
- Cloud Environment: Microsoft Azure, Google Cloud Platform, Heroku, Github

## Professional Experience:

### Zensar Technologies, Pune, India

Front-End Developer | Roles and Responsibilities :

May 2022 - Till Date

- **Developed** high-performance, user-friendly web interfaces that prioritize accessibility and scalability.
- **Proficient** in leveraging React JS and Vue.js frameworks to build robust and scalable web applications.
- **Successfully integrated** RESTful APIs into multiple client-side projects, ensuring seamless data exchange.
- **Optimized** code and asset delivery through server-side caching mechanisms, lazy loading, and other performance enhancement techniques.
- **Implemented** agile methodologies (Scrum, Design Thinking) to accelerate project delivery by 30%, foster cross-functional collaboration, and expedite feature releases.
- **Experienced** working with Azure Cloud environments, demonstrating proficiency in cloud-based development.

### Tagembed, Jaipur, India

Front-End Developer | Roles and Responsibilities

August 2021 – May 2022

- **Implemented** visually appealing user interfaces using React (Hooks) and Redux for effective state management.
- **Successfully integrated** RESTful APIs using Axios to enable seamless data exchange between the client and server.
- **Adhered to** agile development methodologies to ensure efficient project delivery and adaptability.
- **Proactively addressed** client-side issues to maintain application performance and user satisfaction.

### Socialmeedya, Jaipur, India

React Developer | Roles and Responsibilities :

June 2020 – June 2021

- **Managed** the development, maintenance, and ongoing improvement of client websites.
- **Provided** technical solutions and support to clients, addressing their needs and resolving issues effectively.
- **Engaged in** client meetings to understand requirements, build relationships, and generate new business opportunities.

### Saachi Technologies, Jaipur, India

React Native Developer (Intern) | Roles and Responsibilities :

January 2020 - April 2020

- **Successfully implemented** product solutions for mobile applications, delivering high-quality and user-friendly experiences.
- **Demonstrated expertise** in cross-platform mobile development using React Native, efficiently creating applications for both iOS and Android platforms.
- **Contributed to** the development of two major mobile applications, playing a key role in their success.

## Projects

### Property Manager

This Application helps property dealers to maintain a database of their clients and sites at one place on their finger tips. They can share details of properties with client, check their lead counts, converted leads and profit scored

#### Roles and responsibilities:

- Designed and implemented the product solution for a mobile application.
- Cross-Platform Mobile Development using React native.
- Used redux for creating local storage.

### Store Stock

This Application helps shopkeepers to maintain a database of their stocks. They can see details of stock, order directly from the app, maintain bills and generate account statements

#### Roles and responsibilities:

- Designed and implemented Front End for the Application
- Cross-Platform Mobile Development using React native.
- Used redux for creating local storage.

## Certifications:

- Responsive Web Design
- Robotic Process Automation ( UI Path )
