## Core Competencies

---

- Full-Stack Development
- Microservices Architecture
- AWS Infrastructure Optimization
- CI/CD Pipeline Implementation
- SEO Optimization
- RESTful API Design
- Real-Time Application Development
- Agile Methodologies

## Profile Summary

---

Full-Stack Developer with 2+ years of experience engineering scalable MERN and Laravel applications, achieving 40% faster API response times and 80% organic traffic growth through SEO optimization. Implemented CI/CD pipelines with Jenkins and Docker, reducing deployment times by 30%. Specialized in AWS infrastructure optimization, cutting costs by 25%, and delivering high-performance solutions in Agile environments.

## Skills

---

Languages: JavaScript, TypeScript, PHP, SQL, C, Java

Technologies: React.js, Next.js, Node.js, Express.js, Laravel, MongoDB, MySQL, PostgreSQL, TailwindCSS, MaterialUI, ShadCN, Bootstrap, HTML, CSS, jQuery

Tools: Git, GitHub, GitLab, Jira, Figma, Docker, AWS (EC2, RDS, Lambda), Vercel

Others: Full-Stack Development, Microservices, SEO Optimization, Agile Methodologies, Object-Oriented Programming, Data Structures & Algorithms

## Experience

---

Full-Stack Developer, Logicspice Consultancy Pvt. Ltd. – Jaipur, India 03/2023 – Present

- Led a team of 5 to implement CI/CD pipelines with Jenkins and Docker, cutting deployment time by 30% for a SaaS platform serving 15,000+ monthly users.
- Architected scalable MERN applications with microservices, reducing API response times by 40% using Node.js and MongoDB.
- Drove 80% organic traffic growth for client websites by implementing dynamic SEO strategies with Next.js and sitemap automation.
- Optimized AWS EC2 and RDS configurations, saving 25% in costs while maintaining 99.9% uptime for 20+ client applications.
- Designed modular RESTful APIs with Laravel, reducing code complexity by 35% through OOP principles.
- Tech Stack: React.js, Next.js, Laravel, Node.js, Express.js, MongoDB, MySQL, AWS, Vercel

## Education

---

Poornima Group of Institutions, B.Tech in Computer Engineering – Jaipur, India 07/2019 – 05/2023

- CGPA: 8.2/10
- Capstone: Engineered a real-time chat application with React.js, Node.js, and Socket.IO, supporting 500+

concurrent users with Redis caching and 99% uptime.

- Led coding club, organizing 5+ hackathons and mentoring 20+ students in web development.

BDJMS, XII CBSE – Jaipur, India

07/2016 – 05/2018

## Projects

BikeShare – Bike Rental Platform 2023

- Engineered a MERN-stack platform with Next.js and MongoDB, enabling 1,000+ users to list and rent bikes, processing 500+ daily bookings.
- Integrated Stripe with Node.js for secure payments, achieving a 99.9% transaction success rate.
- Streamlined booking flow with React.js and Redux, reducing processing time by 40% and boosting conversions by 25%.
- Designed responsive UI with TailwindCSS and implemented geolocation search with MongoDB, increasing mobile engagement by 30%.
- Tools Used: MongoDB, Express.js, React.js, Node.js, Next.js, Stripe, TailwindCSS

Inventory Management System 2023

- Developed a Laravel-based platform for 50+ retail clients, improving stock tracking accuracy by 60%.
- Designed RESTful APIs for real-time inventory updates, reducing manual entry errors by 60% and saving 100+ hours monthly.
- Tools Used: Laravel, MySQL, RESTful APIs

## Achievements

AWS Certified Developer – Associate 01/2025

Microsoft Certified: Azure AI Fundamentals 01/2022

Hackathon Winner: Poornima Tech Fest – Engineered a real-time traffic monitoring system with React.js, Node.js, and WebSocket, adopted by Jaipur municipality 2022

Open-Source Contributor – Added reusable modal components to [React UI Library Name], adopted by 200+ developers on GitHub 2023
